

OPEN LETTER

Hawaii, March 28th, 2020

From: The Hawaii Healthcare Provider Community

To: David Ige, Governor of the State of Hawaii
Major Kenneth Hara, Adjutant General, Department of Defense, State of Hawaii
Bruce S. Anderson, PhD, Director, Department of Health, State of Hawaii
Administrative Leaders of the Hospitals of Hawaii

We value the incredible amount of efforts spent by hospital leaders to prepare for the COVID-19 crisis and for the opportunity to lend our voice to these efforts. We understand the difficulty of decisions about managing resources in order to prepare for a potential surge of patients with the disease. We would like to express that we are in support of our hospitals and administrators, but as a Hawaii Healthcare Provider Community, we have significant concerns about the varying protocols regarding the use of personal protective equipment (PPE) across the State of Hawaii.

As time is of the essence, we implore the State of Hawaii to provide state-wide recommendations for hospital administrators to follow, as soon as possible. This would help them make these difficult ethical decisions about rationing supplies and keep the message consistent.

At this point, community transmission is taking place and it is known that patients and caregivers can spread the virus when they are pre-symptomatic. As we approach a potential surge of patients, the risk of transmission from patients without clinical symptoms to healthcare workers is constantly increasing. We have learned from reports from China and Italy that healthcare workers are significant vectors of spreading COVID-19 to their families and communities. Therefore, these decisions should be made consensually on the State level based on a meaningful discussion between administrators, epidemiologists, nurses, and physicians.

We are asking the State of Hawaii and Department of Health to implement state-wide recommendations for PPE use and also a transparent tracking of state-wide inventory. This would allow healthcare workers to stay informed about their resources. The DOH should also provide state-wide recommendations on the use of provider-owned PPE as well as non-FDA/NIOSH approved (self-made) equipment in the setting of a shortage.

Our recommendations are as follows:

- 1. Transparent, state-wide tracking of PPE inventory (see Appendix A).**
- 2. Providers should be allowed to use their own FDA/NIOSH approved PPE at any time.**
- 3. Providers should be allowed to use non-commercial (self-made) PPE in a significant shortage of hospital-supplied PPE, with recommendations about the safety of certain types of non-commercial PPE.**

Consistent with the CDC, “in settings where facemasks are not available, Healthcare Personnel (HCP) might use homemade masks (e.g., bandana, scarf) for care of patients with COVID-19 as a last resort. However, homemade masks are not considered PPE, since their capability to protect HCP is unknown. Caution should be exercised when considering this option. Homemade masks should ideally be used in combination with a face shield that covers the entire front (that extends to the chin or below) and sides of the face.”

Press Release 3-28-2020: Patrice A. Harris M.D., M.A., President, American Medical Association. "It is vital that our health care workforce is equipped with a sufficient supply of personal protective equipment, including using their own PPE in order to protect themselves and their patients when no other PPE is available."

4. Acceptance of proper rationing, re-sterilization and re-use practices in the setting of a state-wide shortage.

Most importantly, we should make our healthcare workers feel as safe as possible when taking care of their patients. Nurses, physicians and other essential healthcare workers represent the most limited and valuable resource in this battle with COVID-19. It is the duty of the institutions and the State of Hawaii to assure that they are protected and supported while preparing for this devastating healthcare crisis.

Sincerely,

The Hawaii Healthcare Provider Community

Appendix A. Example of an Inventory Tracking shared document implemented by a Hawaii hospital.

COVID-19

Preventing Infection | Protecting Patients & Staff

Personal Protective Equipment (PPE) Inventory

	Current Inventory (each) 3/26/2020	Regular Usage* Pre-Covid (per day)	COVID Use Stage Three (per day)	COVID Use Stage Four (per day)	Regular Usage Days on Hand	COVID Stage Three Days on Hand	COVID Stage Four Days on Hand
1 Surgical Masks							
2 N95							
3 Gloves							
4 Gowns							
5 Face Shield							

* The baseline for regular usage will be refined as more data is collected over time

	QTY ON ORDER	SPECIAL ORDER PPE
1 Surgical Masks		
2 N95
